OFFICE FOR SPORT

Within the framework of the Kazan Action Plan, adopted by MINEPS VI in 2017, the key-goal of the initiative is to strengthen interaction and cooperations between specialized know-how (universities, research centers, independent experts) and policy makers (public and private bodies) to support science-based, knowledge-based and evidence-based policies and interventions.

Expected outcomes:

- A comprehensive overview of approaches, models, methodologies and tools for impact measurement in the field of Social Inclusion through Sport, aligned with the specific policy areas of the MINEPS VI Follow-up Framework;
- A selection of practices and cases functional to supporting multi-stakeholder partnerships;
- An international informal and permanent working group in the framework of a global forum dedicated to promoting interventions in the field of social inclusion and development through sport, by means of public-private partnerships, impact measurement methodologies and capacity building (employability and entrepreneurship).

Online platform: www.sport4socialinclusion.net

All continents will be represented in the informal working group. Careful consideration of the regional distribution has been made to avoid a euro-centric perspective. Members include selected experts, together with representatives from the main international organizations, sport entities and public and private bodies active in the field of sport for social inclusion.

The working group will seek to facilitate fruitful synergies between existing know-how and the design and implementation of effective policies; making the case for investments into sport and implementing the Kazan Action Plan.

The Meeting will be held in English with simultaneous and consecutive translation ENG-SPA, SPA-ENG.

The organizers are ready to assess and deliver additional tailored services on the basis of specific requests.

WEDNESDAY 24TH

ITALIAN NATIONAL FORUM

Participants: representatives from private and public bodies, actors engaged in the use of sport as a vehicle for social inclusion and development, local Universities, local governments, NGOs, private foundations, private companies, sport bodies specialized or active in the social role of sports.
